

Portal: Maya ↔ Blender Asset Bridge

Developed by Jaisurya C • Quick Artist Reference Guide • Bi-directional Mesh Transfer Tool

⚡ Quick Start Connection:

1. Copy this folder into your local
2. Launch the Portal application using `portal.exe`.
3. Click **Launch Maya** and **Launch Blender** from the main page to open your editors.
4. The connection starts automatically in the background—no manual script setup is required!

🚀 Transferring Assets Step-by-Step

1 Choose Flow Direction: Inside the Portal's main page, select either:

- **Maya → Blender** (transfers selection from Maya into Blender)
- **Blender → Maya** (transfers selection from Blender into Maya)

2 Select Viewport Objects: Select the polygon meshes inside your source application's viewport.

3 Roundtrip Sync: Press the large blue **ROUNDTRIP SYNC** button in the Portal dashboard. The meshes will export and instantly load into the target application.
